# International application No. INTERNATIONAL SEARCH REPORT PCT/US04/34968 BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 1-12, drawn to a method of preparing a dental device, comprising shaping a polymerizable thiol-ene mixture and photopolymerizing the shaped mixture. Group II, claim(s) 13-22, drawn to a dental prosthetic device comprising a polymer obtained from a thiol-ene composition. Group III, claim(s) 23-30 and 32-34, drawn to a photopolymerizable dental material comprising a filler, thiol monomers, vinyl monomers and an initiator. Group IV, claim(s) 31, drawn to a dispensing device comprising a photopolymerizable material. Group V, claim(s) 35-43, drawn to a photopolymerizable mixture comprising a thiol monomer, a vinyl monomer and an initiator. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the feature that links the groups of claims is "wherein at least about 10% of the functional groups in the polymerizable mixture are thiol functional groups". This feature does not provide a special technical feature since compositions comprising compounds having thiol functional groups that provide at least 10% thiol functional groups to the compositions are well known in the dental art. See US Patent 5,100,929 or US Patent 5,889,132.

Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)				
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:					
r. 🗌	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:				
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box No. III	Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)				
	This International Searching Authority found multiple inventions in this international application, as follows: Please See Continuation Sheet				
1.	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:				
4.	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-12				
Remark on	Protest
